Benefits

Ultimate Security

- DigiGone is your private and secure, worldwide communication network that you exclusively lease and operate. Closed to any outside source, you determine who has access, what they have access to, and when. Only authorized users that YOU have selected have access, you have total control of the system.
- Prevent anyone from monitoring your conversations, and have confidence in the security of your conversations and communications. DigiGone uses the National Institute of Standards and Technology approved 256 bit AES (Rijndael) encryption algorithm, in combination with a Cryptographically Secure Pseudo-Random Number Generator, a SHA-256 based Hash Message Authentication Code and other algorithms to securely encrypt your video, voice and data transfers.

For more information, call (757) 615-7053 or email us at DigiGone@ComSecLLC.com

- You can rest assured you can track when and where each key is used at the click of a button, through your DigiGone Secure Communication Management Suite.
- Track, locate and remotely destroy any key that is lost, stolen, or you deem not authorized to access your DigiGone secure communication network anymore.

Extremely Flexible

- Instantly reach out and communicate with any of your clients, partners or employees.
- Conduct sensitive meetings or conversations from anywhere around the world, with anyone in possession of one of your company generated DigiGone keys.
- Secure text message or participate in secure confidential video teleconference, voice or text conversations using your Smart phone, while sitting in the airport
- Hold secure video teleconference calls on your laptop or smart phone from your hotel suite.
- Receive secure updates on sensitive projects from the convenience of your office.
- Conduct secure private meetings with investors on the other side of the world from the comfort of your yacht.
- All DigiGone products can communicate securely with one another.

Convenient and Easy to Use

- DigiGone is a secure alternative to face to face meetings, saving cost of travel and time.
- Travel light and secure. DigiGone runs off of a small flash drive that you plug into a PC and use anywhere. (Windows based Smart phones for DigiGone Secure Mobile). Just plug it in and you are secure!
- Watch, Talk, Text and Transfer Files, all Securely from anywhere around the world

About ComSec, LLC

J.D. LeaSure, Counter Surveillance Specialist is the President/CEO of ComSec LLC. He founded the Virginia Beach-based firm in 2007 filling the need for an experienced and knowledgeable Counterespionage, Countersurveillance and Technical Surveillance Countermeasures TSCM service provider in the greater Virginia /DC Metro area.

He launched ComSec LLC to provide Eavesdropping Countermeasures & TSCM Specialist services to business professionals, agencies, corporations, celebrities, consulting firms, P.I. firms, government contractors, technology development companies and law firms, etc. The organization also implements counter espionage protocols aimed at helping its customers maintain the integrity of their security posture against Corporate, Economic and Industrial Electronic Espionage Threats.

J.D. has been active in Counterespionage and Technical Surveillance Countermeasures TSCM activities since 1984 and has extensive training, knowledge and experience of eavesdropping devices, detection methods and the tactics most often employed by those seeking to steal valuable information. Since its launch, ComSec LLC has enjoyed steady growth and noted a staggering increase in public interest in the counterespionage, counter surveillance segment of the business.
